-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17-47 are rejected under 35 U.S.C. 102(e) as being anticipated by Kudaravalli et al. (US 6471694). Kudaravalli et al. disclose a medical cooling system comprising a coolant supply unit and a medical device (300), a console (700) being connected to the medical device at a connection point on the proximal end of the medical device, a first cooling system (200), a second cooling system (114), a compressor (100), the programmable controller in communication with at least one distal sensor (307) in the medical device and coupled to a first valve (col. 6 lines 2-8) in the first cooling system, wherein the at least one distal sensor is in thermal communication with tissue to be treated, wherein the first cooling system includes a coolant return line leading from the medical device to a coolant scavenging system (512) and wherein the first cooling system and the medical device comprise a substantially open-loop and wherein the enclosure is disposed in a system component external to the coolant supply unit.

Response to Arguments

Applicant's arguments with respect to claims 17-47 have been considered but are moot in view of the new ground(s) of rejection.
